Regions with increment in poverty rates during covid 19 in Uganda, rely on small scale business and entrepreneurial skills to survive lockdown during covid 19 restricted movement affecting the flow of income and increasing poverty rates during.

Government Intervetion in Curbing the Increase in the poverty Rate in Uganda

The high poverty rate increase during covid 19 but government has been taking steps to curb down the increase in poverty rates in these regions

General Trend

One general trend in the variation is the poverty rate increase due to covid 19.

Abnormal trends

South Buganda

has a decreased rate of poverty of poverty during covid 19 than pre covid. This is because of the high productivity of food crops in this region that greatly sustained population during covid 19 period 2020

North Buganda

However being central and highly sustatined by entrepreneurship and trading which was highly affected by lockdown measures leading to increase in poverty rate.
